By means of a modified method we measured the serum ajmaline level after i. v. injection in 21 voluntary experimental persons and after i. m. injection in 12. It was found that ajmaline disappears very rapidly from the circulation. On the average after i. v. administration we found less than 10% after 1 min., about 2.5% (Biological Sciences--Pharmacology, TT, v. 9, no. 4)(over)
